

ENTERPRISE BUSINESS MANAGEMENT SYSTEM

SMART RETAIL AUTOMATION

INVENTORY INTELLIGENCE

ENTERPRISE ACCOUNTABILITY

Vision FOCUS

"Education evolves, and so should its operations. Welcome to a smarter way of running your school - where data drives decisions and technology removes the friction."

Still running your business manually?

Losing Track Of Inventory, Sales, Payments, Or Staff Activities?

Introducing the Enterprise Business Management System — a smart retail automation solution designed to transform modern business operations.

With powerful barcode-powered sales processing, real-time inventory monitoring, automated invoicing, detailed reporting, and advanced security features, your business gains speed, accuracy, accountability, and total operational control.

Track stock movement in real-time, monitor cashier activities, generate professional receipts and reports instantly, manage debtors efficiently, and receive SMS or Email transaction notifications automatically.

Whether you operate a supermarket, school, pharmacy, shopping mall, hotel, warehouse, restaurant, retail store, or corporate organization, this system is built to streamline operations and improve customer service delivery.

From inventory management to profit analytics and enterprise accountability, everything works together in one centralized digital platform.

Smart businesses are moving from manual operations to intelligent automation.

Enterprise Business Management System — Smart Business Operations Start With Smart Systems.

TRANSFORMING MODERN BUSINESS OPERATIONS

In today's business environment, speed, accuracy, accountability, and operational control are essential for growth and customer satisfaction.

MANY BUSINESSES STILL STRUGGLE WITH:

- INACCURATE INVENTORY TRACKING
- SLOW CHECKOUT PROCESSES
- WEAK STAFF ACCOUNTABILITY
- MANUAL OPERATIONAL DELAYS
- BILLING ERRORS
- POOR SALES VISIBILITY

THE ENTERPRISE BUSINESS MANAGEMENT SYSTEM

is designed to solve these challenges through automation, real-time monitoring, and intelligent reporting.

THE PLATFORM PROVIDES:

- Fast barcode-powered sales processing
- Sales analytics and dashboard reporting
- Real-time inventory monitoring
- Staff activity tracking
- Automated invoicing and receipting
- SMS and Email notifications
- Secure role-based access control
- Financial reporting and profit analysis

This creates a centralized digital environment that improves efficiency, reduces losses, and enhances customer service delivery.

POS & INVENTORY FEATURES

INTELLIGENT POINT OF SALE SYSTEM

**THE POS ENGINE IS BUILT FOR:
SPEED, ACCURACY, AND

Judiciary E-Filing System

Developed for the judiciary with great features: electronic case filing from anywhere, electronic affidavit, case tracking, Dashboard for CJ, Judges, CR, Staff and Lawyers. It has voice to text feature, captures live video and audio witness in court. Auto-case assigning, assigned case notifications to judges and lawyers. Full automation for easy dispensation of justice. Contact us today for deployment.

Online School Portal

Full student portal software for management of academic records. It consists of admin, staff, student/parent dashboard with encrypted security. Automatically generate master sheet, rich individual result sheet with passport. No need for compilation, the staff just impute scores using their phone then the portal does the rest automatically. Contact us for details and deployment. Computer based test / exam and e-learning features are available.

Biometric Attendance

Fingerprint and contact-less biometric card with cloud based biometric software. Our biometric software works on android devices, attendance data are automatically recorded and stored on the cloud software, which allows admin to track, monitor attendance from anywhere on the globe. Our biometric

system also sends attendance notification to parents upon clock in and clock out. Parents get attendance alert when their child arrives or leaves the school.

Micro Finance/Thrift

Software for micro finance management, co-operative society, Thrift services. Track and monitor thrift workers while in the field, automatically captures fund collected by your workers while still in the field. No more financial loss. You are in charge, no matter where you are. Kindly contact us today.

Card Access Payment

Great software developed for institutions that use school buses for inlet and outlet of students. Each student/pupil has a unique card, this card is loaded with some amount of money for the child's transport fare. The child flashes the card on a device to gain access to the school bus everyday. Transport fare is deducted from the card each time the child uses the school bus. When the amount in the card is exhausted or below the fare amount, the child can still use the bus but the card is indebted. The school management automatically tracks school bus transport fare, accessing payment history of every child in just seconds. No hassles! No stress, just credit the card and the rest is fun, contact us now for deployment.
